The RNIV Clinical Expert role is focused on enhancing nursing practice and patient care, with specialized skill, knowledge, and expertise of specific patient populations through quality improvement, evidence-based practice, and research. This role provides experiences and training to prepare nurses to move into the Clinical Specialist, Clinical Educator, or Nursing Quality role. While each unit/area may actualize the role differently, the qualifiers for each category are based clinical practice principles.

I acknowledge the information provided in this portfolio is true and accurate. I further acknowledge I have not received a written disciplinary warning in the past 12 months. I understand if I receive a written disciplinary warning I will return to RN III status and will receive a decrease in my salary equal to the compensation received before my promotion to an RN IV.
